Welcome to a whole new world of
switches and electrical accessories.

Freshness of the morning sun and dew or smell of fresh flowers is always invigorating. So it is with any brand. Mint has the dual advantage of freshness as well as familiarity with its range of switches and other electrical accessories.

To get a first hand experience and feel of it, make a switch to Mint.

A photograph of a modern staircase with a stainless steel railing and black treads, set against a light-colored wall. The staircase is the central focus of the image, leading from a lower level to an upper level. The railing is made of polished stainless steel with vertical balusters and a handrail. The steps have black treads and light-colored risers. The background shows a bright, modern interior with a large window and some framed pictures on the wall.

Mint means heritage

Mint is the designer series from Litaski Electricals, a part of the Chennai based Kumbhat Group that has diversified interests in industries like holograms, label and packaging.

Our state of the art factory with updated technological advancements is located in the heart of Ambattur, one of South Asia's most prestigious industrial zones. The powerful combination of our technical and design experts work together to pioneer breakthroughs like Mint.

Mint means indispensable

There are some things that your home or office just can't do without. Mint is one of them.

Sockets

Mint also offers a wide range of sockets (6A URO 2 Pin, 6A Uni D and 6A Multi-socket for Mobiles, or 2 Pin + 3 Pin) and power sockets (16A & 6A Uni, 25A & 6A Uni, 13A Flat Pin English and 13A & 6A Uni)

In both sockets and power sockets, all current carrying terminals are housed in a polycarbonate housing. They have solid brass terminals with proper shrouding as well as shutters to prevent accidental contact with live terminals. The spring loaded brass press components grips plus top pins tightly ensuring uniform surface area contacts to prevent loose contacts and charring of sockets and tops which is normally a common phenomenon while using heavy devices like air conditioner, water geysers etc

Mint switches and sockets have been designed keeping safety as the prime objective. The rare terminals are designed to be finger-proof in normal usage/wiring. The switches & sockets are completely shrouded and meet the required degree of protection – IP20 (Ingress Protection). This provides protection against your finger touching a current carrying part.

Switches

Mint offers a wide range of choices in switches (6A one way and Two way, 6A One way with LED and 6A Bell Push with LED) and power switches (16A One way and Two way, 16A One way with LED and 25 DP with LED). These are built on a design platform that combines higher levels of technical know-how with aesthetic beauty. A protective safety shield and terminal shrouding provide enhanced safety.

- Switches are designed with factory of safety 1.2
- Bounce free mechanism
- Rugged mechanism prevents welding of contacts
- Switches withstands endurance test of 100000 operations

Mint means control

Whether the breeze or the mood, control it perfectly with our range of regulators and dimmers.

Regulators and Dimmers

Mint has step-type fan regulators that provide :

- A totally hum free operation
- 4 position speed controls
- No interference with radio / TV signals
- 360° rotation

Mint dimmer lets you control the mood of any occasion.

Support Modules

We also have a range of support modules to complete your every need.

- Dummy
- Line indicators
- Cord outlet
- TV Antenna outlet
- Piezo bell

Mint means *hospitality*

India has a rich cultural heritage with hospitality sector occupying a prime place to welcome global travellers to India. Keeping this in mind, Mint offers an exclusive range of products for hotels from LED based energy saver foot lamps and path finders to compact speakers; from entertainment jacks, sensor type key tag and mechanical key tag to a range of instruction switches like Internal control unit for do not disturb and please clean my room etc.

Mint means reliability

Mint symbolizes the trust and reliability which the modern age is continuously searching for in its products. From miniature circuit breakers (MCBs) to surface boxes, we offer a wide array of products that provide peace of mind and become an integral part of life.

USB CHARGER

USB Charger is offered in 1M with 1A rating. Shortly we are presenting the usb charger in 2M with 2A rating.

MCB

Mint gives you a compact and reliable range of MCBs which are ideal for protective switching that provides overload and short circuit protection.

MS BOX

- Earthing terminal for safe installation
- Sufficient gauge thickness withstands the concrete setting pressure.
- A single-stroke knockout to make installation easy
- Thread size maintained as per IS Standards.

SURFACE BOX

- Moulded in brass threaded inserts used for perfect installation of mounting frame.
- Ribs designed along with the gussets for better rigidity.

Mint means communication

Communication is synonymous with our product range with its blend of technology to keep pace with the ever growing markets in IT / ITES industries. At Litaski, we have a range of electrical products tailor made to suit to the ever growing demand of this sector.

Mint MCBs are perfectly suited for all heavy appliances like air-conditioners, geysers etc.
